### THE TRUSTEES SHOULD BUY THE WALDINGFIELD RD PROPERTY

The land granted to young Appleton who arrived from England in the 1600's included the land on the opposite sides of 1A and Waldingfield Road (abutting the Ipswich River). The Trustees should purchase this piece of land to return the Appleton Farm Estate to approximate its historical boundaries. I say "approximate" because I am not sure if it was this exact swath. The original Appleton homestead was built on the Waldingfield Road side. Myopia, the Ipswich Historical Society, Ipswich Conservation committee, The Trustees, need to put their heads and pockets together to toss a "Hail Mary", before it is too late. Once it is gone, it is gone. If you zoom into the Planning Committee meetings you get the impression that there is only an either (Ora) or (Multiple Condos) situation, but I beg to differ. The Trustees have already earmarked their funds and fundraising for other projects, but those can wait while this sale of property must take priority, in the name of HISTORICAL PRESERVATION and CONSERVATION. Can I get an AMEN??!!
